

Headlight Manual

PR1600 1600 LUMENS

Thanks for purchasing RAVEMEN product.
Important: For your safety, read this manual thoroughly before using the product and keep it properly for future reference. Scan and like our facebook page for more info and service:

Technical Specifications						
LED: 2 * high-efficiency white LEDs						
Battery: 6000mAh/3.7V rechargeable Lithium-ion battery						
Dimensions (Headlight): 100mm (L)*48mm (W)*27mm (H)						
Weight (Headlight): 220g						
Materials: The front and main body is made by aluminum with Mil Type III Hard Coat Anodizing; the rear part and the handlebar mount are made by durable plastic						
Package includes: front bike light*1, handlebar mount*1, thick silicone shim*1, thin silicone shim*1, USB cable*1, wireless switch*1, CR2032*1						

Performance Parameters						
Mode	Brightness level	Brightness (Lumens)	Run Time (hrs)	Max distance	Impact resistance	Waterproof
Road Biking	High	800	2.5			
	Mid	400	4.0			
	Low	200	7.0			
	Eco	100	20			
	Rapid flashing	400	24	150 meters	1 meter	Vorleuchten: IPX8 Drahtloser Schalter: IPX4
Mountain Biking	High	1600	1.4			
	Mid	800	2.0			
	Low	400	4.0			
Emergency	Turbo	1600	/			

Notes: 1) The above data are tested in Lab in line with ANSI/NEMA FL1 standard and may vary by environment and user conditions;
2) Only the low beam will be in Road Biking mode; Both the high beam and the low beam will be on in Mountain Biking and Emergency modes;
3) To meet IPX8 waterproof standard, please make sure the tail USB caps are securely mounted before use.

Quick Guide

NO.

Item

Description

- ① Low beam Engineered DualLens optical design for road biking and providing anti-glare closed range flood light, perfect for commuting.
- ② High beam Provides far reaching beam in Mountain Biking and Emergency modes.
- ③ Power button 1) Long press the button 3s to turn on/off power.
2) Single click for mode changing between Road Biking and Mountain Biking modes.
- ④ Menu button 1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.
2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.
- ⑤ LED runtime display
- ⑥ Mode indicators
- ⑦ USB output port
- ⑧ Type-C input port
- ⑨ Wireless switch
- ⑩ Other features

Notes:

1) The above data are tested in Lab in line with ANSI/NEMA FL1 standard and may vary by environment and user conditions;

2) Only the low beam will be in Road Biking mode; Both the high beam and the low beam will be on in Mountain Biking and Emergency modes;

3) To meet IPX8 waterproof standard, please make sure the tail USB caps are securely mounted before use.

Headlight: IPX8

Wireless switch: IPX4

150 meters

1 meter

1) Intelligent thermal management circuit to prevent overheating of LEDs.

2) Intelligent Memory circuit remembers the last used brightness level and mode when turned on again.

1) Long press the button 2s to turn on/off the light, single click to change brightness levels, single click the large button to change modes.

2) Open the small cover and place the battery inside with the positive pole facing up.

Transmission range: 0-1 meter; the signal may be weakened due to low battery and low temperature.

1) Press the small button 2s to turn on/off power.

2) Single click for mode changing between Road Biking and Mountain Biking modes.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

1) When power is on, single click to change brightness levels in Road Biking or Mountain Biking modes.

2) When power is on, press the button 0.3s and hold to activate Emergency mode, release to go back to previous mode and brightness level.

Faretti Manual PR1600 1600 LUMENS

Grazie per aver acquistato un prodotto RAVEMEN.

Specifiche tecniche

LED: 2 LED bianco ad alta efficienza
Batteria: 6000mAh/3.7V ricaricabile agli ioni di Litio
Dimensioni (Faretto): 100mm(Lunghezza)*48mm(Altezza)*27mm(Altezza)
Peso (Faretto): 220g
Materiali: La parte anteriore e il corpo principale sono fatti in alluminio con uno spessore di strato di anodizzazione di tipo militare (Type III); la parte posteriore e gli accessori sono fatti di plastica durevole e fibra di vetro
Contenuto della confezione: 1 luce frontale per la bicicletta, n. 1 supporto manubrio, n. 1 spessore in silicone spesso, n. 1 spessore sottile in silicone, n. 1 cavo USB, n. 1 Interruttore wireless, n. 1 CR2032

Parametri di prestazione

Modalità	Livello di luminosità	Luminosità (Lumen)	Durata (h)	Distanza massima	Resistenza all'impatto	Impermeabilità
Ciclismo su strada	Alta	800	2.5			
	Media	400	4.0			
	Bassa	200	7.0			
Ricaricabile	100	20				
Lampadina	400	24		150 metri	1 metro	luce frontale: IPX8 Impermeabilità wireless: IPX4

Note: 1) I dati sopra riportati si riferiscono a test in laboratorio condotti secondo gli standard ANSI/NEMA FL1 e potrebbero subire variazioni in base all'ambiente e alle condizioni d'uso; 2) per soddisfare lo standard di impermeabilità IPX8, assicurarsi che le linguette di chiusura delle porte USB siano fissate saldamente dopo l'uso.

Guida rapida

Montare il Vostro faretto

①

Selezionare la configurazione appropriata per il vostro manubrio:
Quando la spia ④ è accesa, indica che il faretto è in modalità ciclismo su strada (Road Biking).
Quando la spia ④ è accesa, indica che il faretto è in modalità offroad (Mountain Biking).

製品仕様

仕様光源：2灯
パッテリー：リチウムイオン、6000mAh/3.7V
本体寸法：100 x 48 x 27 mm / 重量：220g
本体素材：前部：ボディ：アルミ、ハードアンドアイズ
後部：樹脂、ラバーフィニッシュ
製品内容：ハンドライト本体 x 1、ハンドル取付プラケット x 1、
厚いシリコンシール x 1、薄いシリコンシール x 1、USB ケーブル x 1、
ワイヤレススイッチ x 1、CR2032 x 1。

使用時間等

点灯モード	点灯レベル	明るさ (ルーメン)	連続点灯時間	最大射程距離	耐衝撃	防水
ロードバイクモード	ハイ	800	約2.5時間			
	ミッド	400	約4.0時間			
	ロー	200	約7.0時間			
マウンテンバイクモード	エコ	100	約20時間			
	バルス減速	400	約24時間	150m	1m	ヘッドライト本体: IPX8 ワイヤレススイッチ: IPX4
マウンテンバイクモード	ハイ	1600	約1.4時間			
	ミッド	800	約2.0時間			
	ロー	400	約4.0時間			
緊急モード	ターボ	1600	/			

製品機能

1.ロードバイクモードの「DualLens Optical Design」: 2眼のワイド配光と防眩機能: 運動時などに対向者への眩しさを軽減する。
2.マウンテンバイクモードと緊急モードの「HiLo Beam System」: 自転車並みの配光、遠くまで照らすハイ、ロービーム
3.リアルタイルLEDディスプレイ: 各モードでの使用時間残表示
4.Type C 充電: 一般的なスマートフォンなどの充電器が使用可
5.USBポート: 他のUSB対応デバイスの充電元になる
6.スマート熱管理システム: LEDの過熱防止をする
7.スマートメモリー: 直前のモードを記憶する
8.ワックリースイッチデザイン: 簡単な脱着
